

KCD2 Scene 1: Audited Trajectory-Set Statistics

All values below are computed from the committed 1000-trajectory CSV/JSON evidence; runtime interpolation is excluded.

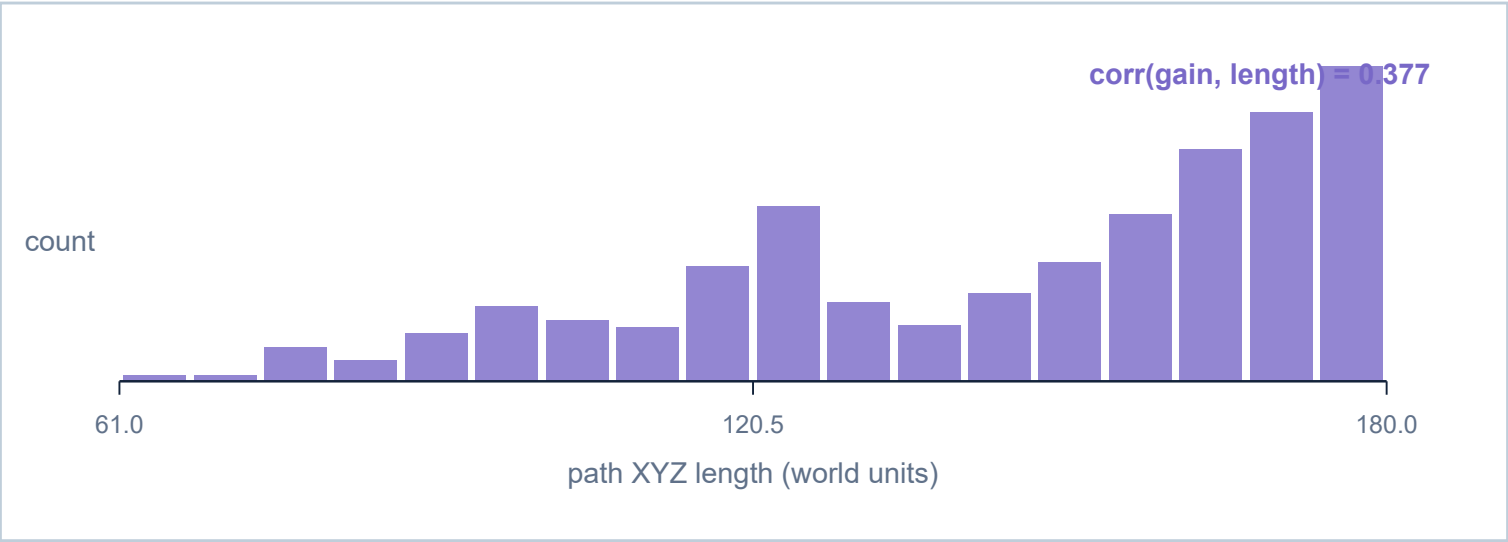

(a) Measured keyframes per trajectory

(b) Aesthetic-score gain

(c) Spatial path length

(d) Validated set-level properties

1,000 / 1,000

trajectories passed validation

8,152

real scored control keyframes

100

unique physical start positions

98.814%

sampled pairs <= 0.70 overlap

Exact max route overlap: 0.897059; collision clearance and runtime-frame scores remain unverified.
