

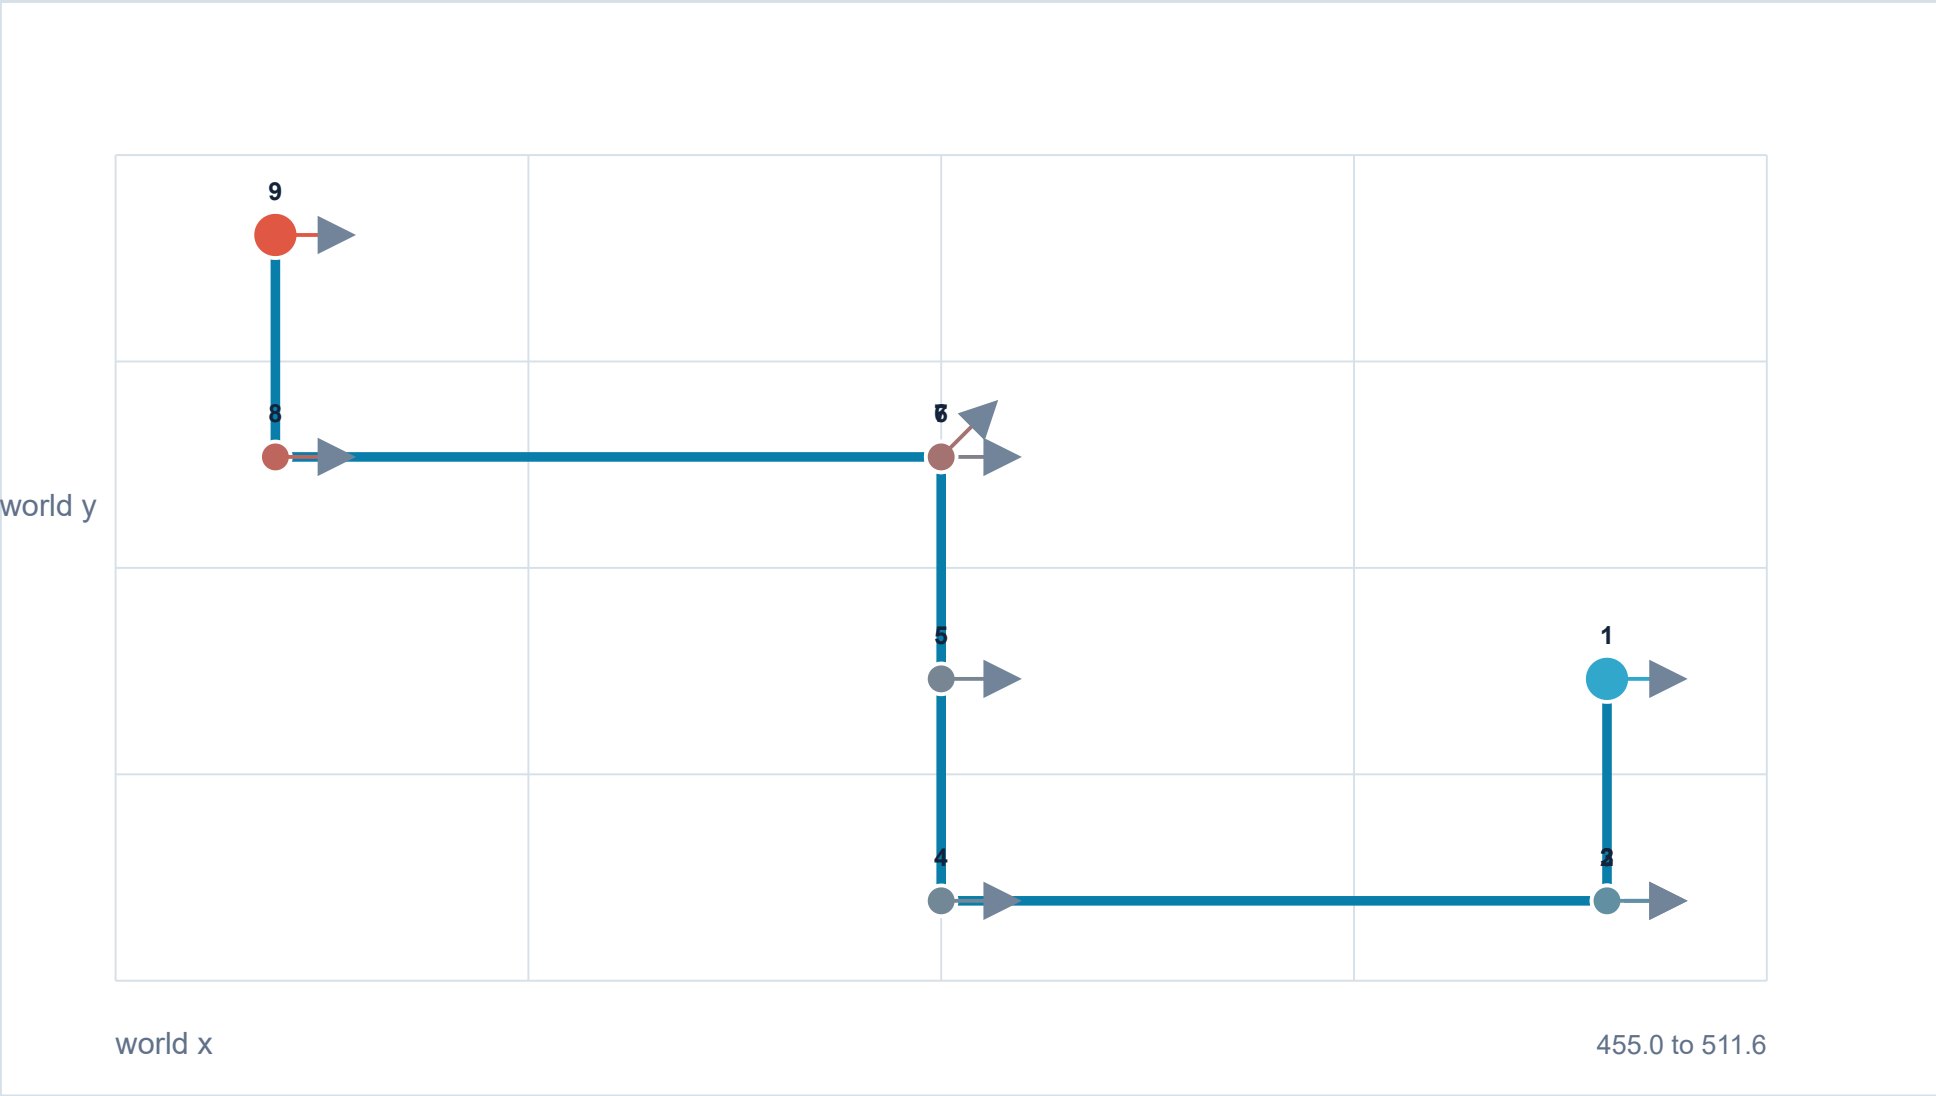

FIGURE 06 / POSE-TRAJECTORY REPRESENTATION

Measured Pose Keyframes Define an Auditable Camera Path

Trajectory 00750 is selected because it has the maximum measured score gain in the 1000-trajectory set.

(a) top-view path and orientation

(b) measured pose sequence

Offline evidence

All nine control poses are real scored source poses and strictly increase to score 7.101753. Smooth runtime frames and collision clearance are not established by this figure.
